(a) gap
infidelity, scaled cost
target $\epsilon$
$10^{-2}$
$10^{-3}$
measured $1-F$
cost / cost$_{\mathrm{ref}}$ $\times\,\epsilon$
1
2
3
assumed gap / true gap
(b) $E_0$ error bar
target $\epsilon$
$10^{-1}$
$10^{-2}$
$10^{-3}$
$10^{-6}$
$10^{-4}$
$10^{-2}$
$\delta E_0$ / gap
(c) overlap
target $\epsilon$
$10^{-1}$
$10^{-2}$
$10^{-3}$
$10^{-4}$
0.4
0.6
0.8
1.0
assumed $\gamma$ / true $\gamma$
